

With our CashPilot software products, we are market leaders in Austria and are now also becoming increasingly active internationally.

For this growth we are looking for

## **EXPERIENCED SOFTWARE DEVELOPERS (C#)**

### **Your tasks:**

- With your help, we will work on the continuous development of CashPilot solutions, create new applications and expand the existing ones with the aim of offering the best products on the market.
- You will accompany the software you create from the drafting of requirements documents, through development, testing and documentation to case-by-case support..

### **What we expect from you:**

- You have a completed IT education and at least 3 years of professional experience.
- You have a very good command of C# and ideally also have knowledge of MVC web development (JavaScript, HTML).
- You speak good German and English in order to be able to communicate with our German and English-speaking customers without any problems..
- You are willing to travel on business on a case-by-case basis..

### **What we offer you:**

- Exciting tasks in the support of our products over the entire software life cycle
- Working in a young, highly motivated, very cooperative team
- A gross annual salary of 55,000 to 75,000 EUR. The actual salary depends on your skills and experience.
- Good work-life balance: flexitime and home office can be arranged individually.
- In our centrally located office in Vienna: free coffee, drinks, public transport tickets, ...
